Portfolio

Education

Government Engineering College, West Champaran

Nov 2022 – May 2026

B.Tech. Computer Science & Engineering CGPA: 8.96 / 10.0

Bettiah, Bihar

Experience

IT Analyst Intern

Dec 2025 – Jan 2026

North Bihar Power Distribution Company Ltd.

Patna, India

- Optimized **500K+ SQL records**, reducing query latency by **30%** through indexing and schema refinement.
- Developed **LSTM-based load forecasting model** to predict electricity demand and support operational planning.
- Built backend data pipelines integrating ML outputs into real-time dashboards across **38 districts**.

Software Engineer Intern

May 2025 – Jul 2025

DevStreak

Remote, India

- Architected scalable **React.js** frontend supporting **2,000+ concurrent users**.
- Designed and integrated secure **RESTful APIs** enabling seamless frontend-backend-ML communication.
- Boosted performance by **65%** via lazy loading, optimized state management, and async handling.

Technical Skills

Programming Languages: Python, JavaScript, TypeScript, SQL, C/C++

Frontend Development: React.js, Next.js, HTML5, TailwindCSS, Bootstrap

Backend Development: Node.js, Express.js, FastAPI, RESTful APIs, JWT Authentication

Machine Learning: Supervised Learning, LSTM, LLMs, RAG, Scikit-learn, TensorFlow, Pandas, NumPy

Databases: MongoDB, MySQL, PostgreSQL, Redis

Cloud & Tools: Docker (Basics), AWS (Basics), Linux, Git, GitHub, Postman

Core CS Fundamentals: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, OOPs

Projects

Enterprise ERP Platform | MERN Stack, Redux, RBAC, JWT | GitHub Live

- Developed full-stack ERP system supporting **1,000+ concurrent users** with secure RBAC-based authentication.
- Architected **25+ REST APIs** using Node.js/Express and optimized MongoDB queries for sub-100ms response times.
- Integrated analytics modules for operational insights and improved frontend load performance by **40%**.

RailMadad – Intelligent Grievance Management System | React.js, Node.js, FastAPI, NLP, MongoDB | GitHub

- Built scalable full-stack application handling **5,000+ monthly complaints** using JWT-authenticated RESTful APIs.
- Integrated NLP-based classification model to automate complaint routing and improve resolution efficiency.
- Designed MongoDB schema and RBAC system for secure, high-volume processing with real-time dashboard analytics.

SmartGrow – AI-Driven AgriTech IoT Platform | React.js, Node.js, Socket.io, TensorFlow, MongoDB | GitHub Live

- Developed real-time IoT monitoring system using **Socket.io** for ESP32 sensor data streaming.
- Integrated ML-based crop recommendation and anomaly detection model improving yield by **25%**.
- Built REST APIs and time-series MongoDB storage for scalable analytics and predictive insights.

Achievements & Certifications

- Competitive Programming:** Solved **150+ DSA problems** on LeetCode, strengthening problem-solving and algorithmic skills.
- Hackathons:** Participated in **Smart India Hackathon (SIH)** 2024 & 2025, developing scalable web-based and technical solutions under time constraints.
- Research & Technical Recognition:** Published paper on *Edge Computing Framework for Smart Classroom IoT* (2025); received **Best Presentation Award** at National Conference on Emerging Technologies.
